ABOUT ME

Detail-oriented Cyber Security Engineering student with hands-on experience developing network security tools and monitoring solutions using Python. Proficient in network traffic analysis, protocol simulation, and Linux systems security. Passionate about identifying vulnerabilities and implementing robust defensive measures.

EDUCATION

Mahendra Engineering College | 2023-2027

B.E Cyber Security

PROJECTS

Linux Firewall (Python, Scapy, iptables)

- Built a rule-based Python application using Scapy to intercept and analyze real-time packet data.
- Programmed dynamic packet-blocking capabilities by integrating the backend logic seamlessly with Linux iptables.
- Designed and built a Tkinter GUI to provide administrators with real-time attack logging, threat visualizations, and firewall control.

Honey Pot

- Engineered a low-interaction honeypot simulating vulnerable SSH, Telnet, and FTP endpoints to capture malicious traffic.
- Analyzed attacker methodologies and brute-force techniques by parsing and logging unauthorized connection attempts.

CERTIFICATIONS & EDUCATION

Japanese-Language Proficiency Test (JLPT) – N5 |The Japan Foundation / JEES

- Issued: Aug 2025 (Validates basic professional working or conversational capability).

NPTEL Online Certification: Enhancing Soft Skills and Personality | IIT Kanpur

- Issued: Apr 2024 (8-week technical communication and personality development course funded by the Ministry of Education).

SKILLS

Cyber Security Fundamentals, Networking, Python, C Programming, Git & GitHub, Excel

LANGUAGES

Tamil, English, Japanese (JLPT N5)
